

Museum ON THE MOVE

M&G opens up the world of learning for K-12 students by bringing the joy of arts integration to the classroom setting. Our experienced and skilled museum educator is available to come to your classroom to teach, and she brings all of the lesson materials needed for each interactive lesson and arts-based STEAM unit. These 30- to 60-minute lessons are tailored to accommodate your individual classroom while meeting national, South Carolina state, and visual arts standards. M&G has been providing this arts-integration program in the core subjects for public, private, and charter school students since 2008.

To schedule an educator to come to your classroom: contact **Anna Hamrick**, M&G's Museum on the Move Coordinator at ahamrick@bjui.edu, or 864.770.1331. She will coordinate fees and educator availability.

To see what educators say about the program and about the standards accompanying each lesson: visit <https://museumandgallery.org/museum-on-the-move/>.

ELEMENTARY

Discovering the Elements Centers (*K-2)

Take discovery to the next level as students explore the elements of art with hands-on activities. Each lesson includes 4 ready-to-explore discovery centers where students will learn about the element of your choice through literature, science, art, and engineering. Art inclusion has never been more fun!

Choose one of the following lessons:

- *Living with Lines*
- *Shapes all Around*
- *Covered in Colors*
- *Talking about Textures*

Reading a Painting: Symbols in Art (*K-2)

Explore fascinating symbols in art by taking a closer look at the objects, lines, and colors that appear in both religious and secular portraits. M&G's educators can adjust this lesson to focus on specific historical figures or literary works. Students will solidify their learning by creating their own symbolic self-portrait.

Marching Into Medieval Times (*1-5)

Learning about medieval times has never been more exciting! Students will see M&G's paintings from the 1300s while learning about life during this unique time in history. At the end of the lesson, each student will create an art related project connected to medieval times!

Uncovering the Mysteries of Ancient Egypt (*1-5)

Take a ride on a time machine back to Ancient Egypt! The Egyptian culture and art will come to life as students dig through a sand box to find replicas of artifacts from M&G. At the end of the lesson, each student will create an Egyptian scarab beetle or cartouche to bring home.

The Art of Illustration (*1-5)

In this lesson, students will be introduced to several methods of illustrating stories including painting, collage, and photography. After looking more closely at a book made entirely out of pictures, students will get the opportunity to create an illustration of their own. This lesson is a great way to enhance literacy instruction.

**Suggested Grade Level (Lessons with a broad age range will be adapted for the grade requested.)*

Museum ON THE MOVE

Art Around the World (*1-5)

Looking for a great way to make geography come alive through art? In these lessons, students will explore one country's artistic and cultural impact on the world. After the lesson, students will put their learning into practice by creating their own piece of art.

Choose from one of the following cultures: Italy, China, Australia, or Egypt.

Ancient Hebrew Culture (*1-5)

In this exciting lesson, students will learn about the life of the ancient Hebrew people. Students will see replicas of museum artifacts, learn about the main holidays in the Hebrew culture, and even listen to a Hebrew story. At the end of the lesson, students will use clay to sculpt a Hebrew oil lamp.

Becoming da Vinci (*1-5)

This lesson introduces students to the famous artist-inventor, Leonardo da Vinci. During this hands-on lesson, students will jump into the world of da Vinci and participate varied activities related to this great master!

Careers in Art (*1-5)

This lesson is a great way to introduce students to a variety of art careers from graphic designers to architects. At the end of the lesson, students will apply what they have learned to a fun art activity.

Diversity in Art (*1-5)

Explore the diverse art of African, Native American, and Chinese cultures. Students will learn about the art of basket weaving, sand painting, porcelain and much more! At the end of this lesson, students will create a Native American rain stick or macrame to take home.

Jumping into the Renaissance (*1-5)

The Renaissance will come alive in this exciting lesson. Students will learn how a moveable type printing press work or listen to a hurdy gurdy (a Renaissance musical instrument). At the end of this lesson, students will create a Renaissance etching of their own to take home.

Pottery of the Catawba Indians (*1-5)

Delve into the world of the Catawba Indians by taking a closer look at their unique process of making pottery and the animal symbolism in their artwork. The lesson culminates with students creating their own clay pot decorated with various animal symbols.

Poetry and Art (*2-5)

Students will learn how color can be used to express emotion in art and how art inspires figurative language. Students will write a color poem and create artwork to illustrate it.

Exploring Ancient Rome (*3-5)

Revisit the times of the ancient Roman Empire to explore the rulers, inventions, and art of this fascinating era. Students will also get a closer look at M&G's Roman glass collection before creating their own artwork.

Math in Art (*3-5)

This lesson is a great way for students to see how math and art work together. Our educator will adapt the lesson to fit your specific grade and math concepts. Each lesson will include a hands-on art activity for students to apply what they have learned.

Greek Drama (*3-5)

In this lesson, students will explore the stories of the ancient Greeks. After looking at different characteristics of Greek drama, students will perform a Greek myth using masks just like the ancient Greeks. At the end of the lesson, students will create a Greek mask of their own!

David Drake-“Dave the Potter” (*3-5)

A South Carolina artist, David Drake countered culture's stereotype of slaves. This creative man found ways to express himself in verse while creating utilitarian pottery pieces. Students will have the opportunity to make a coil pot and decorate the coiled pot with a self-penned couplet.

**Suggested Grade Level (Lessons with a broad age range will be adapted for the grade requested.)*

Museum ON THE MOVE

MIDDLE & HIGH SCHOOL

(Lesson content is adjusted according to grade level.)

Uncovering the Mysteries of Ancient Egypt

Egyptian culture and art will come to life for students in a fun interactive lesson. Students will dig through a sand box to find replicas of artifacts from M&G's collection and create an Egyptian scarab beetle or cartouche to bring home with them.

Greek Mythology

Explore the world and art of ancient Greece by examining the sculptures, theatre, and mythology of this fascinating time in ancient history. Students will have the opportunity to act out a Greek myth and create their own sculpture or mask.

A Look at Ancient Israel

Learn about Israel's patriarchs, history, and culture through the lens of art. The history of the ancient Hebrews will come alive as students see replicas of Hebrew artifacts and paintings portraying Biblical scenes. Students will further their learning by creating a clay oil lamp to take home with them.

Exploring Ancient Rome

Revisit the times of the ancient Roman Empire to explore the rulers, inventions, and art of this fascinating era. Students will also get a closer look at M&G's Roman glass collection before creating their own artwork.

Marching Into Medieval Times

Travel back in time to learn about life during the Middle Ages! Students will learn about the church's important role in the creation of art and will analyze the different techniques used by medieval artists. The lesson will culminate with students creating their own medieval art.

The Art of the Renaissance

The Renaissance will come alive in this exciting lesson. Students will learn how a moveable type printing press work or listen to a hurdy gurdy (a Renaissance musical instrument). At the end of this lesson, students will create a Renaissance etching of their own to take home.

Becoming da Vinci

This lesson introduces students to the famous artist-inventor, Leonardo da Vinci. During this hands-on lesson, students will jump into the world of da Vinci and participate varied activities related to this great master!

Art of the Industrial Revolution

The Victorian Era was the best of times and the worst of times. Discover the roles that men and women played in reaching and reforming society through art. The lesson will culminate with an art activity to extend student learning.

Protestant Reformation and Beyond

Experience the world during the Protestant Reformation by examining works of art from the 1600 and 1700s. Students will learn how protestant reformers like Martin Luther influenced the art world and stimulated the Baroque art movement. The students will create their own piece of Baroque art to extend their learning.

Poetry and Art

Students will delve into the realm of color theory as they learn what different colors communicate through both images and words. The lesson culminates with students writing and illustrating their own descriptive color poems.

**Suggested Grade Level (Lessons with a broad age range will be adapted for the grade requested.)*

Museum ON THE MOVE

Monuments Men (WWII)

World War II involved not only the destruction of human life but also the destruction of human culture. Students will learn about the critical work of the Monuments Men in their endeavors to protect and reclaim Nazi looted art during and after the war. This lesson brings a new perspective to the study of World War II.

Poetry and Art

Students will delve into the realm of color theory and metaphor to learn how abstract ideas are expressed in both word and image. The lesson culminates with students writing and illustrating their own descriptive color poems.

Propaganda and Art (WWII)

In this lesson, students not only review various facets of World War II but will also sharpen their critical lenses as they look for various propaganda techniques in posters from World War II. To extend their learning, students will create their own World War II poster using various propaganda strategies.

Math in Art

Investigate how math connects with the world around us in nature, architecture, and art. Students will examine various works of art through the eyes of a mathematician. Following the lesson, students will demonstrate their learning through math-related art activity.

Careers in Art

This lesson is a great way to introduce students to a variety of different art careers from graphic designers to architects. At the end of the lesson, students will apply what they have learned to a career-based activity.

Science in Art

Find out how artists use science to create and conserve works of art. From observational drawings to restoration techniques, students will link their scientific knowledge with the world of art.

Forensic Skills in Art

Discover how the skills of forensic scientists make their debut in the realm of art research and conservation. After a brief lesson, students will experience various aspects of forensics in stations while also applying these skills to art investigation.

Reading a Painting: Symbols in Art

Explore fascinating symbols in art by taking a closer look at the objects, lines, and colors that appear in both religious and secular portraits. M&G's educators can adjust this lesson to focus on specific historical figures or literary works. Students will solidify their learning by creating their own symbolic self-portrait.
